DATASTRUCTURES & ALGORITHMS

(2012 Course) (204184) (Semester - II)

Time : 2 Hours]

[Max. Marks : 50

Instructions to the candidates:

- 1) Answer Q1 or Q2, Q3 or Q4 and Q5 or Q6, Q7 or Q8.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Use of logarithmic tables, slide rule, Mollier charts, electronic pocket calculator and steam tables is allowed.
- 4) Assume suitable data, if necessary.

SECTION - I

- Q1)** a) Write an algorithm for searching an element in a list of integers using binary search. Discuss the time complexity of algorithm in best case and worst case. [6]
- b) Explain with suitable examples, how do you pass structure variable to a function. [6]

OR

- Q2)** a) Write a function to sort the numbers in a list of integers using insertion sort. Discuss the time complexity of insertion sort algorithm in best case and worst case. [6]
- b) What is subalgorithm? What are its types? Write a subalgorithm to find $n!$. [6]

- Q3)** a) Write pseudocode to create a singly linked list of real numbers. [6]
- b) What is priority queue? What are various ways of implementing priority queue? Explain any one. [6]

OR

- Q4)** a) Explain following: [6]
- i) Garbage collection.
 - ii) Garbage compaction.
- b) Convert following expression into postfix format show all steps and stack contents. During every step. $(a+(b*c/d)-e)$ [6]

P.T.O.

- Q5)** a) Explain with suitable example how will you represent a binary tree using array? [4]
 b) Write psuedo-code to insert an element in a binary search tree implemented using linked representation. [5]
 c) What is threaded binary tree? Create a threaded binary tree for following data. Which is BSF traversal of the tree. 10 20 30 40 50. [4]

OR

- Q6)** a) The preorder and inorder traversal of a tree are given below. Draw the binary tree. Show all steps. [4]
 Inorder traversal : A B C D E
 Preorder traversal : A B C D E
 b) Create a binary search tree for following data. Show all steps. [5]
 MAN, CAR, BAG, SUN, TAN.
 c) What is AVL tree? Explain with suitable example the RR rotation & balance factor. [4]

- Q7)** a) Write a functions to implement DFS traversal of graph implemented using adjacency matrix. [5]
 b) Using prim's algorithm find the minimum spanning of the graph given below. [4]

Fig Q.7 (b)

- c) Write topological sort for following graph. [4]

Fig Q.7.(c)

OR
2

- Q8)** a) Draw the adjacency list of the graph given in Fig. Q7). b) [4]
- b) Using Kruskal's algorithm find the minimum spanning tree of the graph given in Fig. Q7). b). [4]
- c) Write an algorithm to find indegree and outdegree of a vertex in a given graph. [5]
