T.E. (Electronics and Telecommunication) (Insem)						
ELECTROMAGNETIC FIELD THEORY						
(2019 Pattern) (Semester - I) (304182)						
		(201) (2011)		004102)		
Time	. 1	Hour]		[Max. Marks : 30		
		ions to the candidates:		I-	mu. mums . 50	
	<i>1)</i>	Answer Q.1 or Q.2, Q.3 or Q.4.				
	<i>2)</i>	Neat diagram must be drawn wi	_			
	3)	Figures to the right indicate ful				
	4)	Use of electronic pocket calcula		is allowed.		
	<i>5)</i>	Assume suitable data if necessa	ry.	2		
<b>Q</b> 1)	a)	Derive an expression for e	lectric field intens	ity <b>F</b> at any	noint P due to	
<b>L</b> 1)	u)	infinite long line charge wi		ity is at any	[7]	
	b)	. 90		gir due to fol		
	0)	distributions present in fre	,	)	[8]	
		i) Point charge of 12 nc	- '/'		[~]	
		ii) Uniform surface char	ge density 0.3 nC/	$m^{2}$ at $Z = 2$ .		
		<i>-</i> ,	OR			
Q2)	a)	State and prove the Gauss	law.		[7]	
~ /	b)			= 2  V  at  (0, 6)		
		i) Potential at A $(3, 2, 6)$			, ,,	
		ii) Potential at B (1, 5, 7)				
		iii) Potential difference V	B		$\sim$	
		. 6	AD			
Q3)	a)	Find the expression for H due to an infinite long straight filament carrying				
		direct current.			ည [7]	
	b)	State and explain:			5	
		i) Biot's Savart Law		29	÷,	
		ii) Ampere's circuit law.		00	[8]	
			OR		K	
<b>Q</b> 4)	a)	Obtain the expression for H	along the axis of a	circular cond	ductor carrying	
		current I.		9	[7]	
	b)	Find magnetic field intensity H at P(0, 0.2, 0) due to three current sheets				
		of current density 2.7 a <sub>x</sub> A/	m at $y = 0.1$ ; A	$a_{x}$ Avm at y =	0.15 and $-1.3$	
		$a_{x} A/m \text{ at } y = 0.25.$			[5]	
	c)	State the Maxwell's equati	on for static magn	etic field in p		
		integral form.			[3]
